Work Experiences

03/2023 – 08/2023

V4C Management Consulting GmbH
Fullstack Developer - Working Student
Munich, Germany

- Performed end-to-end design and development of UI components, hooks, API integration and debugging for the relaunching of a new company website.
- Led a team of working students in the design, development and deployment of a new company portfolio website using Nex.js, TailwindCSS and Javascript.
- Maintained the security, performance, and reliability of the company website's hosting services and database while providing SEO analytics reports to drive greater engagement.
- Played a pivotal role in data migration from a legacy WordPress site to a Next.js Framework-based website.
- Designed an end-to-end Figma prototype for a management consulting mobile application.

08/2022 – 01/2023

LeanERA GmbH
Frontend Developer - Working Student
Leipzig, Germany

- Supported Frontend Development team by working on the design, development, and implementation of Progressive Web Applications (PWA) and Mobile Applications using Vue, TailwindCSS and Ionic Framework.
- Collaborated with Design, Project Management and QA Team during groom meetings to develop and implement components, functionalities, and features based on customer requirements.
- Practiced pair programming to develop dynamic Nuxt-based responsive web applications, and fetch data from the CDN.
- Successfully developed and deployed a general-purpose customizable video chat module package for the company, compatible with mobile application projects built with Vue and Ionic.
- Leveraged Typescript to maximize scalability, refactoring, team collaboration, developer experience and code maintainability.

07/2019 – 07/2020

Codepth .LLC
Co-Founder & Fullstack Developer
Bhubaneswar, India

- Built responsive web applications for small businesses and individual clients with ReactJS, NextJS, NodeJS, MongoDB, Javascript, TailwindCSS, BootstrapCSS and HTML/CSS.
- Designed and pitched Web and Mobile application prototypes to clients and developers using Figma.
- Responsible for developing and maintaining the startup's digital infrastructures, including relational and non-relational database clusters using MongoDB and MySQL
- Interacted with end-users to analyze user feedback, fix production issues and add new technical features, based on customer feedback.
- Created and maintained technical documentation and user manuals for junior developers and end-users respectively.

Projects

08/2023 – Current

BDesign Corporate - Web Theme Template

- Designed and developed a versatile Corporate portfolio website theme using Next.js, Tailwind CSS, and JavaScript.
- Incorporated a theme switch functionality to seamlessly toggle between dark and light modes, enhancing user experience and accessibility.
- Ensured a highly professional, smooth, and responsive design suitable for various devices, making the theme a valuable asset available for commercial use upon completion.
- The theme can be seamlessly forked and configured for the development and deployment of a full-scale business website.

10/2023 – Current **Borneel Phukan - Personal Web Portfolio**

- Developed a professional portfolio website using Next.js and Tailwind CSS.
- Powered by JavaScript for interactivity and responsiveness, ensuring compatibility across devices.
- Key features include a dedicated blog section, comprehensive portfolio display, client testimonials, and service descriptions.
- Designed with a user-centric approach for a seamless user experience. Dark theme functionality included.
- The website serves as an effective platform for showcasing professional work and creative projects, enhancing personal branding, and attracting potential clients.

09/2022 – 01/2023 **MindCleanse App - LeanERA Project**

- Developed the UI for a video call service from scratch for the MindCleanse App. This feature provides a convenient way for the users to connect and interact with the trainer, personally as well as in a group.
- Designed and implemented email templates for exchange between the app and its users via a customized email.
- Developed various pages for the MindCleanse App, including the animated splash screen, login, forgot password, settings, the home page, and other static pages. These pages play a crucial role in the user experience and functionality of the app.
- Refactored the app several times to improve its performance and fix bugs, making the app more stable and efficient.
