Date of Birth	23/06/1999, Digboi, India

Education

10/2021 – Current

Chemnitz University of Technology

MSc. in Web Engineering

Thesis: Interactive Visualization and Analysis of Machine Learning Algorithm Performance: A User Interface for Accurate Model Evaluation

- Software Service Engineering
- Cloud & Web Applications
- Advanced Management of Data
- Design of Distributed Systems
- Database & Web Techniques
- Machine Learning

06/2023 – 08/2021

Kalinga Institute of Industrial Technology, Bhubaneswar, India

Bachelor's in Computer Science & System Engineering

Thesis: Smart Surveillance Using Face Recognition System

Final Grade: 8.40

- Data Structure & Algorithms
- Web Technology
- Design & Analysis of Algorithms
- Database Management Systems
- Computer Organization & Architecture
- Software Engineering
- Computer Networks
- Operating Systems
- Distributed Operating Systems
- Compiler Design

Work Experiences

08/2023 – 10/2023

PropTechTools GmbH
Frontend Developer - Freelance
Munich, Germany

- Created a user-friendly Figma Prototype for the order management module on a real estate valuation platform, optimizing order creation and editing in a data-intensive table with screen size restriction.
- Successfully developed and implemented the prototype with distinct views for desktop and mobile display using Vue and Tailwind.
- Accelerated product release and development processes by playing a key role in supporting the development team.

03/2023 – 07/2023

V4C Management Consulting GmbH
Web Developer - Working Student
Munich, Germany

- Performed end-to-end design, development and implementation of UI components, hooks, API integration, designing of database schema using Next.js, TailwindCSS and MongoDB respectively, while also maintaining agility during development and relaunching of a new company website.
- Mentored and guided a small team of interns and working students in designing, developing, and deploying of the new company website, while also maintaining legacy codebase using PHP.
- Testing, refactoring and increasing code readability while also reducing code complexity.
- Ensured the security, performance, and reliability of the company website's hosting services and MySQL database, providing SEO analytics reports for improved engagement.

08/2022 – 01/2023

LeanERA GmbH
Frontend Developer - Working Student
Leipzig, Germany

- Supported Frontend team in designing and coding a Vue/Nuxt-based Progressive Web Application (PWA) with Typescript, TailwindCSS, and Ionic Framework.
- Collaborated in Groom meetings with Design, Project Management, and QA teams to implement features based on customer user stories.
- Practiced pair programming for Nuxt-based responsive web app development, dynamically fetching data from CDN using Typescript.
- Created and tested a video chat service for customer applications using cross-platform mobile device emulators.

Projects

08/2023 – Current

BDesign Corporate - Web Theme Template

- Designed and developed a versatile Corporate portfolio website theme using Next.js, Tailwind CSS, and JavaScript.
- Incorporated a theme switch functionality to seamlessly toggle between dark and light modes, enhancing user experience and accessibility.
- Ensured a highly professional, smooth, and responsive design suitable for various devices, making the theme a valuable asset available for commercial use upon completion.

10/2023 – Current

Borneel Phukan - Personal Web Portfolio

- Developed a professional portfolio website using Next.js and Tailwind CSS.
- Powered by JavaScript for interactivity and responsiveness, ensuring compatibility across devices.
- Key features include a dedicated blog section, comprehensive portfolio display, client testimonials, and service descriptions.
- Designed with a user-centric approach for a seamless user experience. Dark theme functionality included.
- The website serves as an effective platform for showcasing professional work and creative projects, enhancing personal branding, and attracting potential clients.

09/2022 – 01/2023

MindCleanse App - LeanERA Project

- Developed the UI for a video call service from scratch for the MindCleanse App. This feature provides a convenient way for the users to connect and interact with the trainer, personally as well as in a group.
- Designed and implemented email templates for exchange between the app and its users via a customized email.
- Developed various pages for the MindCleanse App, including the animated splash screen, login, forgot password, settings, the home page, and other static pages. These pages play a crucial role in the user experience and functionality of the app.
- Refactored the app several times to improve its performance and fix bugs, making the app more stable and efficient.
