- Event organisation

Work Experience

Fullstack Developer - Working Student

V4C Management Consulting GmbH

Munich, Germany - Remote — **March, 2023 - July 2023**

Skills: Next.js, TypeScript, JavaScript, MongoDB, MySQL, TailwindCSS, Git.

- Performed end-to-end design and development of UI components, API endpoints, and debugging for clients and for the relaunching of a new company website.
- Led a team of working students in the design, development and deployment of microservices for a new company portfolio website using Next.js, TailwindCSS, Javascript and Git for version control.
- Maintained the security, performance, and reliability of the company website's hosting services and database while providing SEO analytics reports to drive greater engagement.
- Played a pivotal role in data migration from a legacy WordPress site to a Next.js web application, with a focus on microservice software architecture.
- Designed an end-to-end Figma prototype for a management consulting mobile application.

Frontend Developer - Working Student

LeanERA GmbH

Leipzig, Germany - Hybrid — **August, 2022 - January, 2023**

Skills: TypeScript, Vue.js, Nuxt.js, Ionic, TailwindCSS, Pinia, Git

- Designed, developed, and implemented Progressive Web Applications (PWA) and Mobile Applications.
- Collaborated with Design, Project Management and QA Team on sprint meetings to develop and implement components, functionalities, and features based on customer requirements.
- Practiced pair programming to develop dynamic and responsive web applications, that fetch data from custom CDN.
- Successfully developed and deployed a video chat API module, compatible with mobile application projects built with Vue and Ionic.
- Acquired knowledge of UI design principles, user-centric design methodologies, and hand-on experience

Co-Founder & Fullstack Developer

Codepth .LLC

Bhubaneswar, India - Hybrid — **July, 2019 - July, 2020**

Skills: ReactJS, NodeJS, MongoDB, MySQL, JavaScript, TailwindCSS, BootstrapCSS, HTML/CSS, Git

- Built responsive web applications for small businesses and individual clients.
- Designed and pitched Web and Mobile application prototypes to clients and developers using Figma.
- Responsible for developing and maintaining the startup's digital infrastructures, including relational and non-relational database clusters using MongoDB and MySQL.
- Interacted with end-users to analyze user feedback, fix production issues and add new technical features, based on customer feedback.
- Created and maintained technical documentation and user manuals for junior developers and end-users respectively.

Education

MSc. in Web Engineering

Chemnitz University of Technology, Germany **October, 2021 - Present**

MindCleanse App - LeanERA Project

September, 2022 - January, 2023

- Developed the UI for a video call service from scratch for the MindCleanse App. This feature provides a convenient way for the users to connect and interact with the trainer, personally as well as in a group.
- Designed and implemented email templates for exchange between the app and its users via a customized email.
- Developed various pages for the MindCleanse App, including the animated splash screen, login, forgot password, settings, the home page, and other static pages. These pages play a crucial role in the user experience and functionality of the app.
- Refactored the app several times to improve its performance and fix bugs, making the app more stable and efficient.
