ABOUT ME

Experienced software developer with 3+ years in Next.js, React, Node.js, and Tailwind CSS, along with Figma design skills. Seeking part-time or full-time opportunities in UI/UX design and Frontend Development. Passionate about creating user-centric, visually engaging experiences and staying updated with industry trends.

WORK EXPERIENCE

Frontend Developer - Short-Term Contract
PropTechTools GmbH [08/2023 – 10/2023]

City: Munich
Country: Germany

1. Developed an intuitive Figma Prototype of the order management module for an API-based real estate valuation platform, ensuring a user-friendly interface for order creation and editing within a data-intensive table.
2. Implemented a functional frontend model for the web app using React.js and Tailwind CSS, significantly improving the user experience of the valuation platform.
3. Played a pivotal role in expediting the company's product release and supporting the development team in accelerating development processes.

Web Developer - Working Student
V4C Management Consulting GmbH [03/2023 – 07/2023]

City: Munich
Country: Germany

1. Performed end-to-end design, development and implementation of UI components, hooks, API integration and debugging for the relaunch of company website.
2. Mentored and guided a small team of interns in the design, development and deployment of the relaunched company website.
3. Maintained the security, performance, and reliability of company website’s hosting services and MySQL database while providing SEO analytics reports to drive greater engagement.
4. Troubleshooting and bug fixing within custom plugins of the legacy company website.

Frontend Developer - Working Student
LeanERA GmbH [08/2022 – 01/2023]

City: Leipzig
Country: Germany

1. Supported Frontend Dev team by working on the design, development, and implementation of Progressive Web Application (PWA) using Vue, TailwindCSS, and Ionic Framework.
2. Worked with Design, Project Management, and QA Team via Groom meetings to develop and implement components and features based on customers' user stories.
3. Practiced pair programming to develop a Nuxt-based responsive web application and dynamically fetch data from the CDN using Typescript.
4. Accomplished customer requirements by maintaining and developing features for responsive web applications using the Nuxt framework.
5. Created and tested a video chat service for customer applications using cross-platform mobile device emulators.
6. Leveraged Typescript to maximize scalability, refactoring, team collaboration, developer experience, and code maintainability.

PROJECTS

BDesign Corporate - Web Theme Template
[07/2023 – Current]

1. Designed and developed a versatile Corporate portfolio website theme using Next.js, Tailwind CSS, and JavaScript.
2. Incorporated a theme switch functionality to seamlessly toggle between dark and light modes, enhancing user experience and accessibility.
3. Ensured a highly professional, smooth, and responsive design suitable for various devices, making the theme a valuable asset available for commercial use upon completion.

MindCleanse App - LeanERA Project
[09/2022 – 01/2023]

1. Developed the UI for a video call service from scratch for the MindCleanse App. This feature provides a convenient way for the users to connect and interact with the trainer, personally as well as in a group.
2. Designed and implemented email templates for exchange between the app and its users via a customized email.
3. Developed several Vue components for the MindCleanse App.
4. Developed various pages for the MindCleanse App, including the animated splash screen, login, forgot password, settings, the home page, and other static pages. These pages play a crucial role in the user experience and functionality of the app.
5. Refactored the app several times to improve its performance and fix bugs, making the app more stable and efficient.
